

**THINK BIG!**

# AUSTRALIA

Australia is home to many large structures and sculptures that are significant to the areas in which they are found. There are more than 150 of them scattered throughout the country. Often they represent the produce of the local region or town (eg the Big Pineapple at Woombye in Queensland - see left) but they can also be objects, landforms and even people!

**TO DO:**

1. Research the internet to see how many BIG structures you can find in Australia. Mark their locations on the map below.
2. Divide the examples you have found into appropriate groups. Which group is the biggest?
3. Where are most of these BIG things found? Why do you think this is?
4. What do you think is the purpose of these structures? Do they achieve this purpose?
5. Imagine you were in charge of building a BIG thing in your local area. Who or what would you choose? Why? Where would you locate the structure? Why?
5. Make a model of your structure using clay or similar material.
