

FAUNA OF THE DESERTS

Although at first sight deserts may appear to be lifeless, they are actually home to many creatures. As a class, brainstorm the names of creatures found in both hot and cold deserts. Fill each of the boxes in the table below with the name of a different creature. (Some Australian examples have already been added for you.) Research each creature you have selected. Where is it found? Write one interesting fact about each creature below its name.

Insects	Animals	Birds
	Thorny Devil	
Witchetty Grub		
	Bilby	
		Budgerigar
Australian Desert Ants	Dingo	
		Emu
	Red Kangaroo	
Trap Door Spider		
		White-winged Fairy Wren
