

Step by Step Ladybugs! with Faber-Castell

STEP 1:

Want to make one yourself? Simply print the black and white pre-printed template.

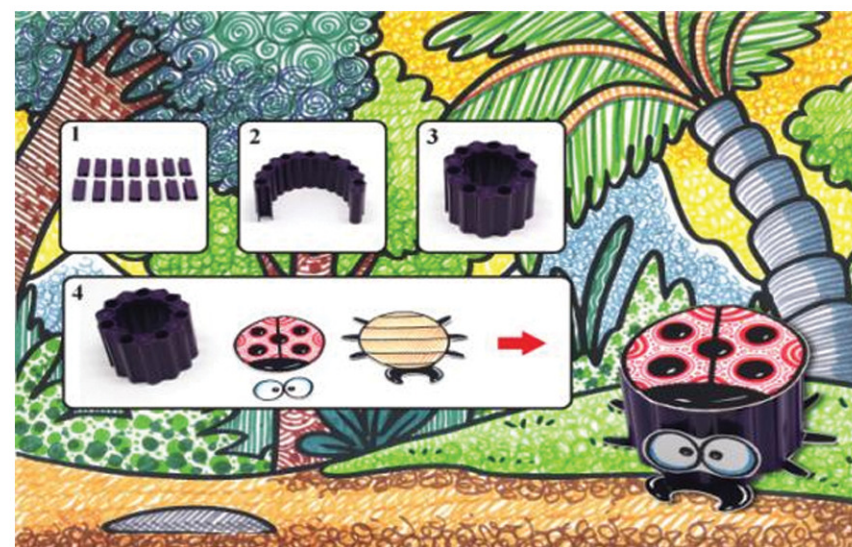

STEP 2:

Colour, cut and decorate to make your very own Ladybug Craft! Then attach to a ring of Connector Pen Lids as shown below for a 3D effect!

FEELING CREATIVE?

Design your background scenery!

Creative Tips!

Using Lines to Colour

Using Connector Colour Pens, you can colour in your drawings with parallel lines to get a different look. By placing the lines closer to each other you can add intensity and shadow to your drawings.

Curves

To draw curved objects just colour your drawing using bent lines.

Lighting and Shading

You can get shadows as well as a dimensional effect by using different shades of the same colour on different parts of the drawing. The closer the lines are together, the darker the shade. The further the lines are away, the lighter the shade.

Shining and Lighting effects

You can also colour your drawings with dots. By changing the space in between dots, you can get shining and lighting effects. The best product to colour using dots are Faber-Castell Poster Art Pens, because they have bigger tips.

Creating New Colours

You can create new colour with dots by drawing dots of different sizes, densities and colours. This can give the appearance of a single colour when viewed from distance.
