

# Hitachi Interactive

The versatility of the interactive touchscreen lends itself to a variety of uses from classrooms, libraries, special education, foyers, lecture theatres and meeting rooms.

Experience the freedom and simple efficiency of running your next lesson, meeting or presentation using an interactive LED backlit, LCD display. The 65" display will form the centrepiece of even the most aesthetic spaces while providing you with an incredibly useful and engaging way to run your lessons and presentations. The panel uses integrated infra-red sensors to detect contact with the screen and gives you the unique ability to control your computer by touching the image.

## Features at a glance

- **65 Inch Full HD Resolution Panel**

Present in style and in absolute clarity. The optimal resolution of the panel will produce crisp and clean images and display the detail needed for productive and professional meetings.

- **Up to 4 points of simultaneous input**

Multi-touch is at the heart of our integrated interactive display and this is achieved with smooth and interruption free interaction with up to 4 simultaneous inputs.

- **Driver-less interactive operation\***

Simply plug in your computer and you're ready to go. No software or driver installation required.

- **Front facing stereo speakers (15+15)**

Front facing speakers means the dual 15W stereo speakers deliver the sound to you and your audience directly for the best results every time.

- **3 Year On-site Warranty\*\***

The peace of mind and convenience of on-site service in the unlikely event of a technical fault. Full Terms & conditions are available on request or on the warranty card supplied with the product.
