

DESIGN YOUR OWN ROAD SIGN

The type and placement of road signs is very important and should be carefully considered. The most effective signs should 1. Command attention 2. Make the meaning clear at a glance 3. Be positioned to allow adequate response time.

Choose an aspect related to road safety and design your own warning sign.

You may choose to be humorous or serious but you should take the points mentioned above into account.

Be prepared to explain why you chose your design and colours to the rest of the class.

What factors would you take into account when placing your signs?
