HOW TO MAKE A

Bostik Christmas Tree Angel

STEP 1

Print the template and find a clean surface to work on. Make sure you have everything you need.

STEP 2

Using the Blu Stik, glue the dress template to the white card. Cut around the template. The template will be hidden on the inside.

TIP: On the template the dotted lines are fold lines and the solid lines are to be cut out.

STEP 3

Blu-Tack the wings template to the piece of white card. Cut around the template. Once cut out, remove the template and Blu-Tack.

Do the same with the hair (yellow card), face (cream card) and halo (silver card).

TIP: If you find it easier you can always use the Blu Stik to glue the templates to the card.

STEP 4

Apply the Glue Tape and Blu Stik as shown on the template. Roll the dress and stick both sides together.

Use the Blu Stik to glue the hair to the face.

Stick the ends together of the halo with the Glu Tape. Press firmly to stick.

Use the black marker to draw on the Angel's face.

STEP 5

Apply a small amount of Glu Tape to the end of the halo and stick it to the back of the angels head. Then use the Blu Stik to glue the face the top of the dress.

Stick the wings in place at the back of the Angel using the Glu Tape. Make sure the wings are centred and straight.

STEP 6

Decorate with Glitter Glue and leave to dry.

HINT: You can also use coloured markers to decorate the Angel.

You now have a lovely Angel to sit at the top of your Christmas tree!
