Bostik Solar System

WHAT YOU WILL NEED

Paint brushes

Craft Paint

Long cardboard box
(40cm x 20cm)

Gold Cardboard

Bostik Craft PVA Glue

Polystyrene Balls
(assorted sizes) x 10

Split Pin x 20

Scissors

Measuring Tape

Fishing Wire

Protractor

Pencil

Bostik Glitter Glue

Bostik Solar System

STEP 1

Paint the inside and outside of the box black and leave to dry. Once dry, use Bostik Glitter Glue in silver to apply dots to the inside of the shoebox. These are stars!

STEP 2

Paint the planets and Pluto (dwarf planet). Use Bostik Glitter Glue to add some sparkle.

STEP 3

It's time to create Saturn's ring! Measure the circumference of Saturn. If you need some help, ask your teacher! Use the compass to draw a circle the size of Saturn's circumference on the gold paper. Draw another circle around the first circle to form a ring.

STEP 4

Cut out the ring and place it around Saturn. Apply Bostik Craft PVA Glue to hold it in place.

STEP 5

Next, cut fishing line and tie around a split pin. Stick the split pin into the top of each planet and Pluto. Tie another split pin around the other end of the fishing line.

STEP 6

Use a pair of scissors to pierce 10 holes, one for each of the planets and Pluto, in the top of the box. Next, poke the split pins through the holes and secure to the outside of the box.

PLANETS: COLOUR AND ORDER!

Sun = yellow and orange

Mercury = dark grey

Venus = light yellow

Earth = green and blue

Mars = red

Saturn = yellow

Jupitar = orange

Uranus = light blue

Neptune = dark blue
