

Make a cute spider for Halloween!

AIM:

Make your very own spider for this Halloween.

MATERIALS NEEDED:

- Coloured popsticks
- Moving eyes (103790)
- Pom poms (335009 or 100171)
- Stems small (106364)
- Paint – Optional
- Wool
- Glue

INSTRUCTIONS:

1. Glue 3 yellow popsticks together in the middle to form a crisscross pattern. This is the base of your spiderweb.
2. Depending on the colour you want you may need to paint the popsticks.
3. Once the glue is dry, layer wool around the latticed popsticks to form the web. Start by tying up the wool at the centre in a knot to keep it sturdy. Hide the knot underneath the centre of the popsticks.
4. Weave the wool around each section gradually moving the spacing out until you reach the outer edge. Cut the excess wool once the spiderweb is complete. Glue the loose end of the wool to one of the popsticks so it doesn't unravel.
5. Glue one small animal striped pom pom on top of one large animal striped pom pom. To make the head and body of your spider.
6. Glue two small moving eyes onto the smaller pom pom.
7. Select stems and cut into 4 pieces to form the legs. Twist them in the middle to make them sturdy and then glue to the bottom of the larger pom pom.
8. Glue entire spider to the web.
