# SMARTER MEETINGS AUTOMATICALLY.

## Logitech Rally

Logitech® Rally offers an Ultra-HD imaging system, delivering brilliantly sharp video, outstanding color, and exceptional optical accuracy at resolutions up to 4K. The modular audio system brings crisp, clear audio and unmatched voice clarity to the table.

Rally comes standard with one speaker and one mic pod for medium and large sized meeting rooms. For larger spaces, you can add one additional speaker and up to six additional mic pods.

Rally's modular audio components mean that speakers and mic pods can be placed wherever they are needed, achieving full audio coverage in your meeting space. Rally supports up to seven mic pods in total, helping you create the perfect audio configuration for your space.

Rally features RightSense™ proactive technologies, which make better meetings easy and automatic. RightSight™ auto-frames participants no matter their distance from the lens, RightLight™ prioritizes faces over environment to render natural-looking skin tones, while RightSound™ enhances vocal

clarity by suppressing background noise, auto-leveling voices, and focusing on active speakers. RightSense is compatible with most any video conferencing application that works with USB devices, including Google® Hangouts™ Meet, Microsoft® Skype® for Business and Teams, and Zoom.

Elegantly designed with premium finishes, thoughtful cable management, and modular audio, Rally integrates beautifully into any room design.

## FEATURES & BENEFITS

### VIDEO

#### Exceptional Video Quality

With an Ultra-HD imaging system, Rally delivers brilliantly sharp video, outstanding color, and exceptional optical accuracy at resolutions up to 4K.

#### Adaptive Pan, Tilt and Zoom

The smooth PTZ motor adjusts pan and tilt speed with the amount of zoom. The result: Faster camera movement when zoomed out for quick framing and slower camera movement when zoomed in for more control.

#### Sleek Industrial Design

The premium PTZ camera is elegantly finished in matte black and slate gray metal trim, complemented by sleekly designed audio components and accessories that look great in any room.

### AUDIO

#### Advanced Modular Audio

Rally delivers sound that's natural, crisp, and highly intelligible. Exquisitely sensitive Mic Pods ensure that everyone in the meeting can be clearly heard while stand-alone speakers fill larger rooms with rich, life-like sound.

#### Front-of-Room Audio

Rally speakers are designed for placement at the front of the room. With mic pods on the table and speakers at the display, voices and video come from a natural direction — and never from behind you — so conversations feel more natural and lifelike.

#### Up to 7 Mic Pods

For large meeting rooms, add Rally Mic Pods to expand audio coverage and provide convenient access to mute controls. Each pod adds coverage for six additional participants, perfect for equipping large meeting spaces and boardrooms.

### CONNECTIVITY & USAGE

#### Smart Cabling and Content Sharing

With a Display Hub and Table Hub to minimize cross-room cabling, Rally components and the meeting computer remain securely out of sight.

#### Loud and Clear

The built-in amplifiers in Rally Display Hub can power up to two Rally Speakers, providing rich sound even in larger rooms.

#### Optional Flexible Mic Pod Cabling

Rally Mic Pod Hub makes it easy to minimize cross-table cabling with three connectors for Rally Mic Pods or additional Mic Pod Hubs, helping participants reposition individual pods or to bring mute control within easy reach.

#### Optional Mounting Kit

Add the Rally Mounting Kit to streamline installation of each component with custom brackets and mounting hardware.

## RIGHTSENSE TECHNOLOGIES AND DESIGN INNOVATIONS

Integrated Logitech RightSense technologies, built into Rally, automate a better user experience. RightSight perfectly auto-frames participants no matter their distance from the lens. RightLight prioritizes faces over environment to render natural-looking skin tones while RightSound enhances vocal clarity by suppressing background noise, auto-leveling voices, and focusing on active speakers to support better meetings.

#### RightSight

Logitech RightSight camera control technology automatically moves the lens and adjusts the zoom so no one gets left out of the picture. RightSight detects human figures, not just faces, to ensure that meeting participants remain in view and optimally framed on-screen.

#### RightLight

Logitech RightLight with Wide Dynamic Range (WDR) helps everyone look their best on camera, regardless of lighting conditions. RightLight reduces video noise, optimizes light balance, and fine-tunes color and saturation for natural results across all skin tones.

#### RightSound

Logitech RightSound is a suite of audio processing technologies and design innovations that deliver enterprise-class sound to video conferences. Optimized for the human voice, RightSound reduces unwanted vibrations and noise, and zeroes in on the active speaker to convey their every word with remarkable clarity.
