

AD-AC-PS

Media storage sliding panel

Designed to accommodate AV equipment behind the screen, the sliding panel makes installation and maintenance of media players and networking devices simpler and easier.

Media storage sliding panel

Universal

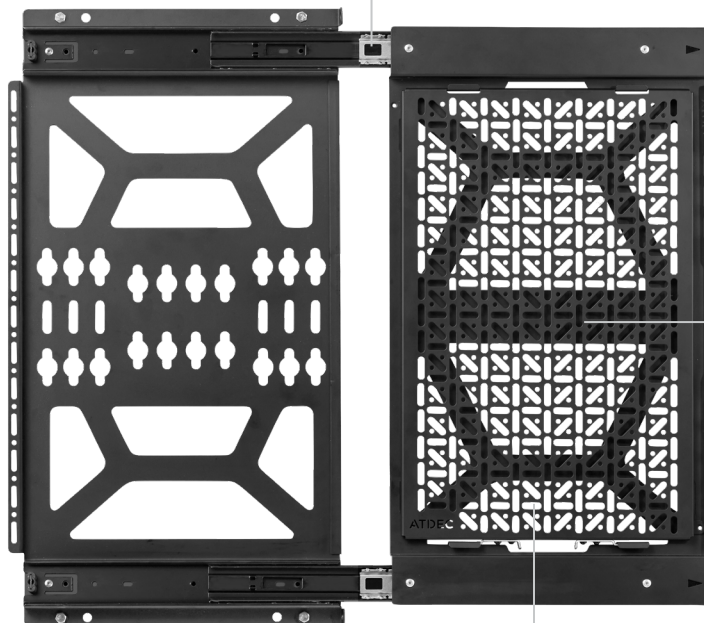

8kg

Extended sliding distance for easy servicing (up to 350mm)

Left or right-side installation

Removable mounting tray with hook-on installation & quick release/attachment mechanism

6mm padlock hole for added security

Generous mounting area
273 x 420 mm with universal mounting hole pattern

Security screws

10 year warranty

Media storage sliding panel

Important:

The media storage panel's depth when attached to the wall is 18mm.

When choosing a compatible display bracket and mounting arrangement, consider the depth of the equipment attached to the sliding panel to allow for free sliding movement.

The total **minimum distance from the wall to the back of the display** is a sum of the following dimensions:

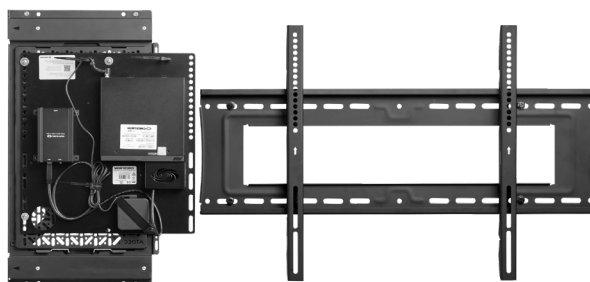

$$B \text{ (minimum)} = A + C + D$$

A: depth of the tallest device attached to the sliding panel

B: clearance of 3mm recommended to allow for variances

C: depth of the sliding panel (18mm)
